help or guidance if I find something is not clear.

- **Strategic**
  Desire to write a perfect, clear, readable, maintainable, and bug less piece of code can easily come into conflict with tight deadlines. I have learned that sometimes the team has to sacrifice some of the quality in order to deliver. Other times the deadlines have to be pushed back, in order to do the right thing. I always aim to find the sweet spot between the two.
- **Team player**
  I love helping team members on their path to learning new things. And help the team in their work process by finding ways to automate manual labor.

Achievements & Rewards

Vice president of executive club in university during session 2013-2014
